

— VESPER · DN HACKS

The drone war is a comms war.

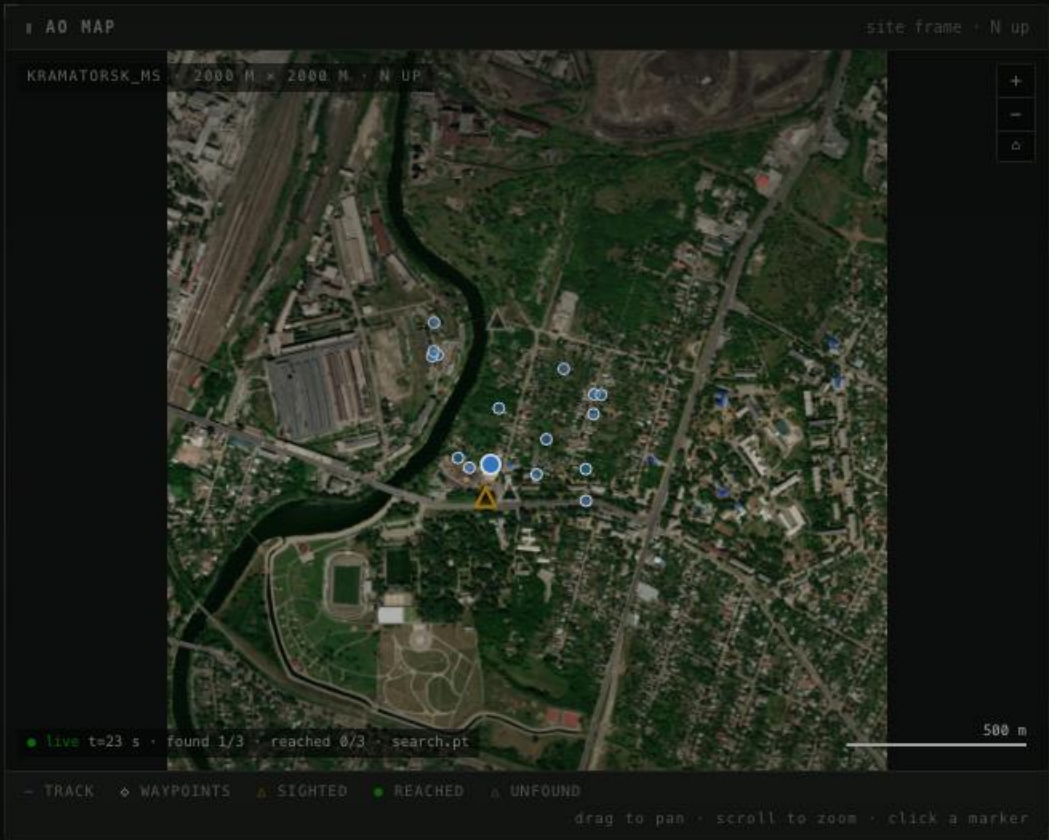

Jam the link and an FPV is a **falling brick**. So they fly on 20 km of fiber — a leash. **You can't scale a leash.**

EASHAN VAGISH · THEO OLTEAN

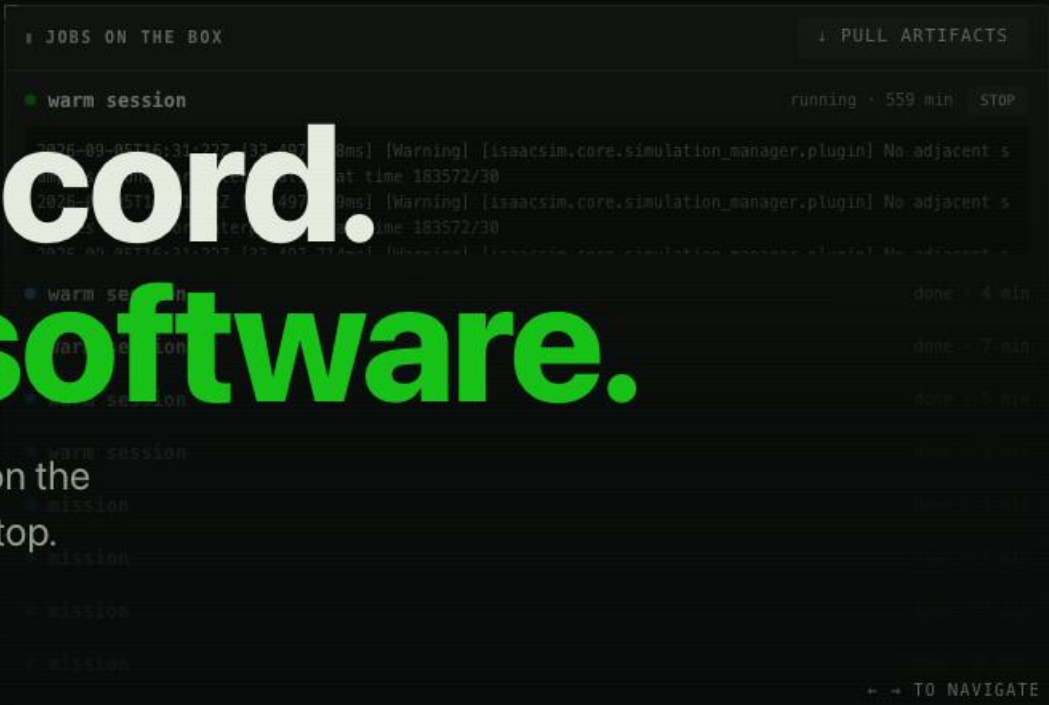

UKRAINE · EVERY GLINTING THREAD IS ONE DRONE SORTIE'S FIBER, LEFT WHERE IT FELL

A VILLAGE NEAR THE FRONT, SILVERED WITH SPENT FIBER-OPTIC CABLE — DRONES FLOWN BY WIRE BECAUSE RADIO IS DEAD. WAR-REPORTING PHOTO — CREDIT THE SOURCE.

You can't scale a cord.
We cut it — with software.

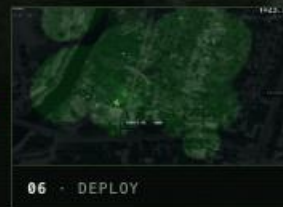

Vesper flies without the link. Small models, trained for one job, running on the drone itself — search, detect, navigate. Jam everything: the hunt doesn't stop.

— THE PIPELINE

Coordinates in. **Hunters out.**

This background is not a photo — it's our sim. We rebuild the real battlefield in 3D — satellite, lidar, OpenStreetMap — model the jammers too, because **comms is terrain**, then fly a million RL sorties inside it and ship the weights to the drone.

KRAMATORSK — RECONSTRUCTED AUTOMATICALLY. OUR DRONES TRAIN, FLY, AND DIE IN THIS WORLD BEFORE THEY EVER FLY THE REAL ONE.

— INSIDE STEP 05 — TRAINING

A million sorties **before the first real one.**

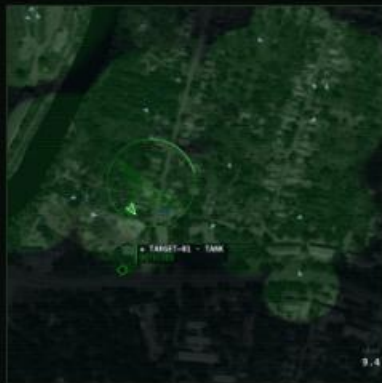

LOST ———► METHODICAL ———► **LETHAL** · SAME POLICY, SAME TERRAIN — THE ONLY THING THAT CHANGED IS TRAINING

Millions of rollouts in the twin — nobody wrote a waypoint, nobody scripted a behavior. **Then the weights ship straight to the drone.** What you're about to see live is that policy flying.

● GOING LIVE · KRAMATORSK AO · THIS MAC

Watch it hunt. Find it. Call it in. Get the nod. Kill it.

01

SEARCH

One shared map. Sixteen hunters sweeping it.

02

DETECT

Armor in the treeline. Tagged in seconds.

03

UPLINK

Jammed? Hold the report. Fly to where the link lives.

04

APPROVE

The request hits your screen. You approve — or you don't.

05

STRIKE

One nod. One munition. One kill.

It hunts alone. It never kills alone.

— VESPER

Point it at any coordinates **on Earth.**

This is the strike — through the drone's own eyes. Photoreal replay of a real run: dive, detonation, done. Kramatorsk today. Anywhere tomorrow.

EDGE-AUTONOMOUS — RUNS ON A MAC COMMS-AWARE, JAM-RESILIENT HUMAN-AUTHORIZED, ALWAYS RL-TRAINED, NOT SCRIPTED
